

ENTERPRISE ACTIVITIES

OVERVIEW – AERONAUTICS

The Kent County Board of Supervisors adopted a resolution to acquire the buildings and to obtain possession of the County-owned land being used as an airport on January 14, 1930, and voted to construct the airline apron in October 1931. Although the operation of an airport is not mandated, once the County decides to have an airport, certain activities are then mandated by State and federal laws.

In 1956, the Board of Commissioners established the Aeronautics Board. The resolution establishing the board assigned it certain powers, duties and authorities, including determining fees and rentals; providing for concessions to supply goods, services and commodities; and investigating methods of improving the airport. Due to the language of the resolution which says the board has those “duties,” these activities are considered Board-authorized by resolution.

The Aeronautics Board was also delegated the authority to make decisions on matters related to certain operational aspects of the facility; however, the authority to make a decision regarding certain activities cannot be construed as a directive to provide them. Additionally, since the delegation of decision-making authority makes approval by the Board of Commissioners unnecessary, activities approved solely by the Aeronautics Board (e.g. Air Cargo and Trade Center, parking services, etc.) cannot be considered Board authorized and are therefore, considered discretionary. As a result, regulations regarding these operations are then also considered discretionary.

Provide law enforcement support of passenger screening systems	Transportation Security Reg Part 1542	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>			<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

OVERVIEW – DEPARTMENT OF PUBLIC WORKS

In April 1962 the Board of Commissioners voted to establish a Department of Public Works “for the administration of the powers conferred upon the county by the terms of Public Act 185 of 1957 as amended.” This act enables the County to create a department of public works but is not mandated to do so. The Department of Public Works is an enterprise fund and no General Fund dollars are appropriated to support this function.

The duties and functions which have been undertaken by the Department of Public Works have, for the most part, been authorized through Board resolutions and/or contracts and are not state mandated.

ADMINISTRATION & FINANCE

Assisting local municipalities to secure financing for their water and sewer projects has been authorized through various Board of Public Works agreements. The administration and finance functions of the Department of Public Works are considered necessary for the purposes of this study, as they ensure the smooth and efficient operation of the department.

SOLID WASTE MANAGEMENT

Over the years the Board of Commissioners has authorized the Department of Public Works to build, operate, and maintain solid waste disposal facilities, which currently include landfills, a recycling facility, three recycling drop off facilities, three household hazardous waste facilities, a transfer station, and a waste-to-energy incinerator. The only state-mandated functions are to maintain closed landfills that are owned and maintained by the County and have an approved solid waste management plan.

When the Michigan legislature adopted Public Act 641 of 1978, otherwise known as the Solid Waste Management Act, the Board of Commissioners opted to create a solid waste management plan for Kent County pursuant to the act. They did this via a resolution approved at the May 2, 1979 meeting which authorized a Notice of Intent to be filed with the Michigan Department of Natural Resources to file a Solid Waste Management Plan. In that same resolution, the Board of Public Works was appointed as the designated agency responsible for the preparation of the plan. While the legislation has been superseded by more recent legislation, the County Board has continued to appoint a planning committee as provided by law, and to use the Board of Public Works as the designated solid waste planning agency. The County is not required as a governmental entity to take on this task, however once it does so, the activities of the planning committee and the preparation and communication of the plan are prescribed by the most recent legislation, MCL 324.11534 and 324.11535 (Public Act 451 of 1994).

The County currently owns and operates one active landfill and maintains three closed landfills. In 2009 the County entered into an agreement with Granger Electric to build and operate a landfill gas-to-energy facility located at the landfill site. The County also owns and operates a solid waste transfer station located on 10 Mile Road. The County owns and operates a residential material recycling facility which prepares recyclables for market. The recycling program also

markets and sells recovered materials and runs a public education program about the County's solid waste programs. Marketing and selling recyclable materials is a necessary function of the County's recycling program, however public education is considered a discretionary activity.

The waste-to-energy facility incinerates solid waste and produces electricity which is sold to Consumers Power.

WATER AND SEWER

The water and sewer projects undertaken by the Department of Public Works have been authorized through Board of Public Works resolutions and contracts on a project-by-project basis. Once these projects are completed, it becomes necessary for the Department of Public Works to inspect and maintain the systems and to approve new connections.

The Department is permitted by State statute to own, operate, maintain and finance water and wastewater systems. Historically, the Department has partnered with local units of government to provide these services but the Board of Public Works has since transferred all water and sewer projects and services to local management and ownership at the request of the local units.

Department of Public Works
