

HEALTH & WELFARE

OVERVIEW - HEALTH

Public Act 368 of 1978 (The Public Health Code) as amended, mandates counties to have a health department. The same law permits, but does not require, the Board of Commissioners to appoint a board of health. Kent County created a board of health in October 1978. In April 2001, the Board of Commissioners approved reorganization of the Health Department and restructured the Board of Health as a Community Health Advisory Committee.

The code also details numerous specific functions and activities to be performed by the local health department. In 1994, the Michigan Department of Community Health (DCH) negotiated the Consensus Plan with local departments which reduced the mandated functions to nine “required” programs:

Vision Screening	Food Service Sanitation
Hearing Screening	Immunization
Public Water supplies	Sexually Transmitted Diseases
Private & Type II Groundwater Supplies	On-site Sewage Disposal Management
	General Communicable Disease Control

With respect to these required services, the Code states that the local health department shall “provide or demonstrate the provision of required services...” (MCLA 333.2433 (e)). Thus, a health department is only mandated to deliver the service directly if it cannot demonstrate that it is otherwise sufficiently available in the county. For purposes of this report, these services are identified as mandated, but it should be noted that assurance of the program is the mandate, not the provision of the service by the County.

Functions and activities outside of the mandated services are the responsibility of the State of Michigan Department of Community Health (DCH). In many cases, however, DCH has decided to provide funds to local health departments to carry out these functions. Such a delegation is allowed by the Public Health Code, which includes broad enabling - permitting rather than requiring - language relative to these activities. The Comprehensive Plan and Budget Contract (CPBC) - an annual agreement between the County, the Health Department and DCH - is the vehicle by which the State and the County agree to what services will be delivered by the Health Department and the funding that will be provided by the State. The Board of Commissioners’ approval of the CPBC document listing all the functions to be performed by the Health Department and the standard of service associated with the programs is considered to be acceptance of those terms and conditions.

The following sections detail the functions and programs of the County’s health services which are primarily provided by the Health Department and organized below according to the division to which they are assigned and where the funding required for their performance is budgeted.

ADMINISTRATION

In addition to setting forth specific requirements, the Code also includes some general statements of responsibility for the health department: planning and evaluating public health programs, investigating diseases and hazards, and tracking trends and statistics. In addition, the Administrative Division performs functions such as managing departmental information technology needs and facilities, which the County is not required to have but which are necessary

to achieve the efficient delivery of public health services as mandated by the State and authorized by the Board of Commissioners.

Grant and contract management is not a required service per se, but if the County authorizes the Health Department to accept a grant program, it is necessary to have a mechanism in place to manage the funds and administer the program.

The Emergency Preparedness program coordinates activities and services with various agencies to ensure that the Health Department and our community partners are prepared to provide services to the residents of Kent County in the event of an emergency. It includes the development of systems and procedures to assure a controlled, coordinated, and organized response to any county-wide emergency. This program was created following the September 11, 2001 attacks to prepare and respond to such events as smallpox outbreaks, anthrax or the release of other biological agents.

COMMUNITY CLINICAL SERVICES

Clinic services include the mandated services of childhood immunization, as well as services included in the CPBC such as Women, Infants and Children (WIC) Program and TB, HIV, and STI Screenings. Certain immunizations not required by law to be provided are also made available at the clinics on a fee basis. Lead screening is provided as part of the WIC Program.

The immunization program maintains immunization status data as mandated by state statutes. Immunization program staff work with all schools and licensed childcare providers in Kent County to provide training and to facilitate the submission of mandated reports. In the event of an epidemic or threatened epidemic MCL 333.9203 mandates that the County provide immunizations free of charge. The statute does not include specific funding for the free immunization and therefore it is an unfunded mandate; however, in the past, the State has provided partial funding in the case of mass immunizations.

COMMUNITY NURSING

The Community Nursing Division delivers specific services to residents outside of the clinic setting. Most of the services performed by the staff of the Nursing Division are included in the CPBC. The one mandated program performed by the staff in this division is vision and hearing screening. Strong Beginnings services were first approved by the Board of Commissioners in 2004.

ENVIRONMENTAL HEALTH

The Public Health Code identifies DCH as the environmental health agency for the state (MCLA 333.12103), however, it also contemplates that much of the local inspection work and application processing will be carried out by the local health department (MCLA 333.12106). Specifically, Public and Private Groundwater Supply and On-site Sewage Disposal Management are services that are actually mandated to be performed by DCH, but are among the required services for local public health operations under the 1994 agreement.

With respect to Food Service Sanitation, the Public Health Code was amended in 2000. As a result, the oversight for food service sanitation was given to the Department of Agriculture under MCLA 289.1101 et.seq. The new language states that the Department of Agriculture or the local health department shall conduct food service inspections and that all records shall be maintained

by the local health department. Food service sanitation is a required service under the 1994 agreement.

The Code addresses inspections of campgrounds and swimming pools somewhat ambiguously, requiring only that DCH *or* the local health department inspect such facilities. Subdivision/Condominium on-site systems also are required to be inspected by the State, which may delegate the authority to the local health department. In some instances the State has included provisions in the Department of Environmental Quality (DEQ) contract requiring the local health department to act as its agent to do the inspections, in other cases, the duty has just been informally delegated to or assumed by the local health department.

Administration of the dog damage reimbursement program is mandated to the County and performed by the Health Department. Similarly, the sale of dog licenses is mandated to the Treasurer; the Health Department assists in this effort as a matter of customer service. The County Board of Commissioners officially assumed the responsibility for the animal shelter. According to MCLA 287.289a, the Board of Commissioners may establish an animal control agency, but is not required to do so. Kent County took over operation of the animal shelter (known at the time as the dog pound) from the City of Grand Rapids in 1940. The bulk of the remainder of the animal control functions in this section are performed pursuant to the Animal Control Ordinance adopted by the Health Department in 1980. Revisions to the animal control regulations were approved by resolution on 8/10/00.

The remainder of the programs of the Environmental Health Division have been added by the Health Department in response to what it believes is a public safety or health issue. The law allows, but does not mandate, such a response. Certain programs are provided by contracts which were not approved by the Board of Commissioners, or in some cases (campground inspections) are supported by fees but have never been formally brought before the Board for approval as a program of the department. These programs are all considered discretionary programs of the department.

HEALTH EDUCATION AND PROMOTION

The Health Education and Promotion section is responsible for the department's activities that provide education programs, prevention programs, and outreach programs. Most of these programs are offered pursuant to grant agreements, either separated from or referenced in the CPBC. In addition, some programs have been added as discretionary activities of the Health Department in response to specific requests or because the department has believed the education program is consistent with the department's goals and mission.

MEDICAL EXAMINER

The duties of the County with respect to the medical examiner are mandated to the County and not to the Health Department.

OVERVIEW – COMMUNITY DEVELOPMENT/HOUSING COMMISSION

Kent County is eligible to receive, but not required to accept, funding from the Community Development Block Grant (CDBG) program administered by the U.S. Department of Housing and Urban Development (HUD). The annual CDBG grant amount is determined by a federal statutory formula based on County population, degree of poverty and housing conditions and the national appropriation by Congress. The Board of Commissioners annually approves the application for funds and the CDBG Action Plan. All CDBG funds must be used for specific eligible activities detailed in federal statutes and regulations.

Among the programs supported by the CDBG program is the Housing Rehabilitation program. Additionally, this Community Development program is designed to provide low interest (3 percent) or deferred loans to low and moderate income home owners.

In 2005 the Community Develop/Housing Commission also began securing HOME funds from the Federal Government to support first time home buyers. The purpose of the HOME Program is to increase the supply of safe, decent, sanitary, and affordable housing for low and very-low-income households.

The Department also operates a Shelter Plus Care grant program, as authorized by the Board of Commissioners. The Community Development Department is responsible for implementing the Shelter Plus Care program, which contracts with non-profit housing corporations to provide rental units as permanent housing for homeless individuals and families.

The Kent County Housing Commission was established by the Board of Commissioners in August 1993 to provide rental assistance to extremely low and very-low income families outside of the cities of Grand Rapids, Wyoming, and Rockford which have their own housing commissions. This resolution authorizes the Housing Commission to seek, receive and disperse federal funds for housing purposes as allowed by law and in accordance with the purposes authorized by Michigan law.

As a part of the Section 8 Housing Choice Voucher program, the Housing Commission also operates a Family Self-Sufficiency (FSS) program. The primary goal of the FSS program is to move participants from welfare to work by helping families identify barriers to employment and set goals detailing the steps that families will take to obtain the assistance needed to acquire and retain employment.

In 2006 the Housing Commission was approved as an official HUD HomeOwnership Program. The intent of this program is to provide home ownership opportunities for Housing Choice Voucher clients completing the required HomeOwnership education programs.

OVERVIEW - VETERANS' AFFAIRS

In 2008, the County created a Department of Veterans' Affairs to take over the duties of the Soldiers' and Sailors' Relief Commission which had provided services to County veterans since 1899. The mandated services for the County under this new structure, however, remain unchanged.

The State of Michigan established the Veteran's Relief Fund in 1899 and enabled the County to levy an annual tax not to exceed one-tenth of a mill to support the County's indigent, honorably discharged veterans. The amount of the levy is not specified, with only a maximum and no minimum requirement. The attached table indicates that this is a fully-funded mandate as state statute permits the levy of a tax which, if levied, would provide revenue to support the mandated services.

The distribution of funds from the account to support indigent veterans, including spouses, parents and minor children is mandated. The Department's provision of information and referral assistance is considered a discretionary service of the County.

The County is also mandated to provide burial assistance for eligible veterans, and to provide for the foundation for grave markers provided by the federal government.

Veterans' Affairs Department

OVERVIEW – SENIOR SERVICES

At the request of a group of citizens, the Board of Commissioners submitted a ballot question to County voters to approve a millage to provide services to persons age 60 and older in Kent County. On November 3, 1998, the electorate approved the levy of the millage for eight years, resulting in a mandate to the County to provide such services. In August 2006, voters approved a renewal and an increase again renewing the County mandate to provide senior services until 2013.

Although the proposal language approved by voters did not specifically reference administrative activity, the statute authorizing the County to submit such a ballot question states that the funds may be used for planning, coordinating and evaluating senior services. These activities are generally considered part of the administration of the program, which has been established as a separate expenditure item. Administration is considered necessary for the provision of the service.

OVERVIEW – DEPARTMENT OF HUMAN SERVICES

The Department of Human Services (DHS) is a state agency to which the County is mandated to, “within its discretion,” appropriate funds for certain activities. The activities of the agency to which County funds are directed as a result of this mandate include Administration and Hospitalization, and Children’s Services.

The Social Welfare Act requires the County Board of Commissioners to set the salary for DHS Board members, but does not mandate that the Board pay the salary. The Act only requires the County to “within its discretion, make such appropriations as are necessary...to defray the cost of administration of these services.” Traditionally, County funds have been used to pay the salaries, as well as to fund some DHS administrative staff expenses, which have included travel, benefits, computer equipment and software, etc.

With respect to hospitalization, the “mandate” is also somewhat ambiguous. The Social Welfare Act requires that indigent persons receive hospital/physician care, and sets forth conditions under which the cost of such care will be paid by the State. Expenses for such care which are not able to be paid by the State are paid for with County funds, pursuant to language requiring that the County, “within its discretion, make such appropriations as are necessary to maintain the various welfare services of the county as provided in the act....”

Similarly, the County provides funding to the DHS for services for children within, or likely to come within, the jurisdiction of the court (under certain conditions). The Social Welfare Act requires the State to reimburse the County for 50 percent of the expenses of providing those services. The remainder of the expense is paid for by the County pursuant to the above language. The relationship of the County and the State in this case, however, is more formally stated and agreed to through the Child Care Fund Plan and Agreement, which is approved annually by the Board of Commissioners.

The law also requires that the County Treasurer serve as the custodian of all funds provided for the use of the DHS. In this case, the County simply serves as a pass-through with respect to state and federal funds for DHS operations, maintaining the funds and records as required by the State.

Finally, the County also annually appropriates funds to the DHS to allocate to various human service programs and client needs within the County for which no other funding source exists. The appropriation of the funds to the DHS for human service programs and for client needs was formalized in February 2000 when the Board of Commissioners approved a Memorandum of Understanding with the DHS for provision of these services.

CONTRACTUAL – HUMAN SERVICES

ALLIANCE FOR HEALTH

The Alliance for Health was established in 1948 as a voluntary organization to coordinate construction of health care projects in West Michigan. In 1968, the Alliance was designated as a health planning agency by the State, and was required to provide local match funding to receive State grant funds.

In 1992, the County became an employer member of the Alliance for Health, and approved payment of the membership fee to maintain that status.

AREA AGENCY ON AGING OF WESTERN MICHIGAN, INC. (AAAWM)

Area Agency on Aging of Western Michigan, which serves Kent and eight other West Michigan counties, was established in 1974 as a regional organization to plan for, secure and administer federal, state and local funds to provide services for individuals 60 years of age or older.

Participation in the program is not mandated, but the Board of Commissioners elected to do so and in June 1974, appointed its first representatives to the board. Each year the Board authorizes a voluntary contribution of funds to AAA to provide a match so that Kent County seniors can benefit from available federal and state funding which requires such a match. Appropriation of such funds is required for participation on the AAA Board of Directors. The Board of Commissioners approves the Area Agency's state-mandated multi-year action plan.

AREA COMMUNITY SERVICES EMPLOYMENT AND TRAINING COUNCIL

The Area Community Services Employment and Training Council (ACSET) was created pursuant to an inter-local agreement between Kent County and the City of Grand Rapids. The agreement specifies representation and financial obligations for services and programs. Services of the Council are primarily funded through federal block grants to the State which are passed on to local councils. For Kent County residents, services include intake and assessment, crisis intervention, home weatherization and energy services, senior services, housing/homelessness services, USDA surplus commodity distribution, information and referral and certain translation assistance. Employment and training programs are also available through the Council to Kent and Allegan county residents.

NETWORK180

Counties are not mandated to provide mental health services. The Mental Health Code (Public Act 258 of 1974, as amended) mandates only that the County pay 10 percent of the net cost of mental health services to residents of the County.

Kent County created a community mental health services program board (CMHSB) in April 1966, and adopted procedures and regulations for its operation in October 1975. Public Act 290 of 1995 allows counties to create a Community Mental Health Authority. In September, 2002, the County Board of Commissioners passed a resolution creating a Kent County Community Mental Health Authority to continue community mental health services programs. The County Board of Commissioners appoints the Community Mental Health Board members and provides a local match through an annual General Fund appropriation and allocation of the Liquor Tax.
