

Employees who have known exposure to person with confirmed COVID-19

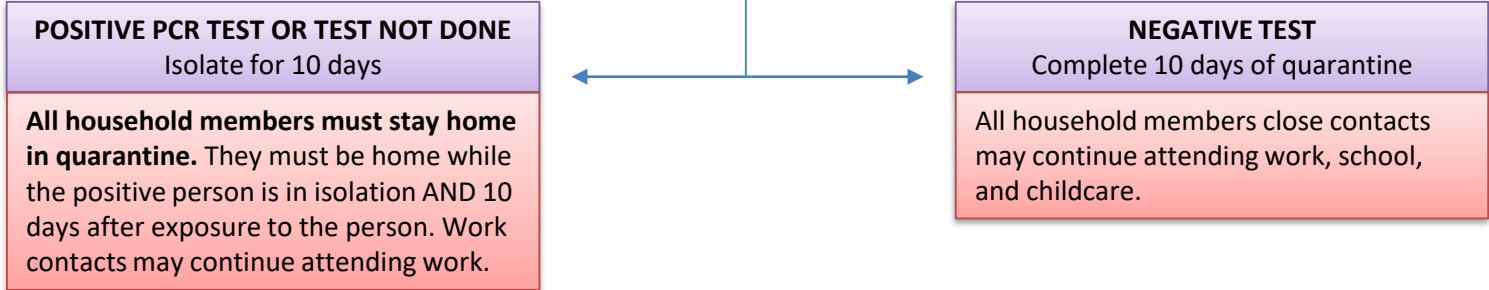

- The 14-day quarantine period cannot be shortened for those in congregate living settings or those who work with individuals in high-risk groups.
- All other individuals may quarantine (stay home) for 10 days from last exposure. If you do not develop symptoms by day 10, you may end quarantine, but you should continue to monitor for symptoms over the next 4 days.
- Consider COVID-19 testing but you must stay home for quarantine period **EVEN** if your test is negative.

COVID-19 TESTING INDICATED IF employee DEVELOPS SYMPTOMS DURING THE 14 DAYS AFTER EXPOSURE

Employee HAS NO SYMPTOMS BUT IS TESTED DURING THE 14 DAYS AFTER EXPOSURE

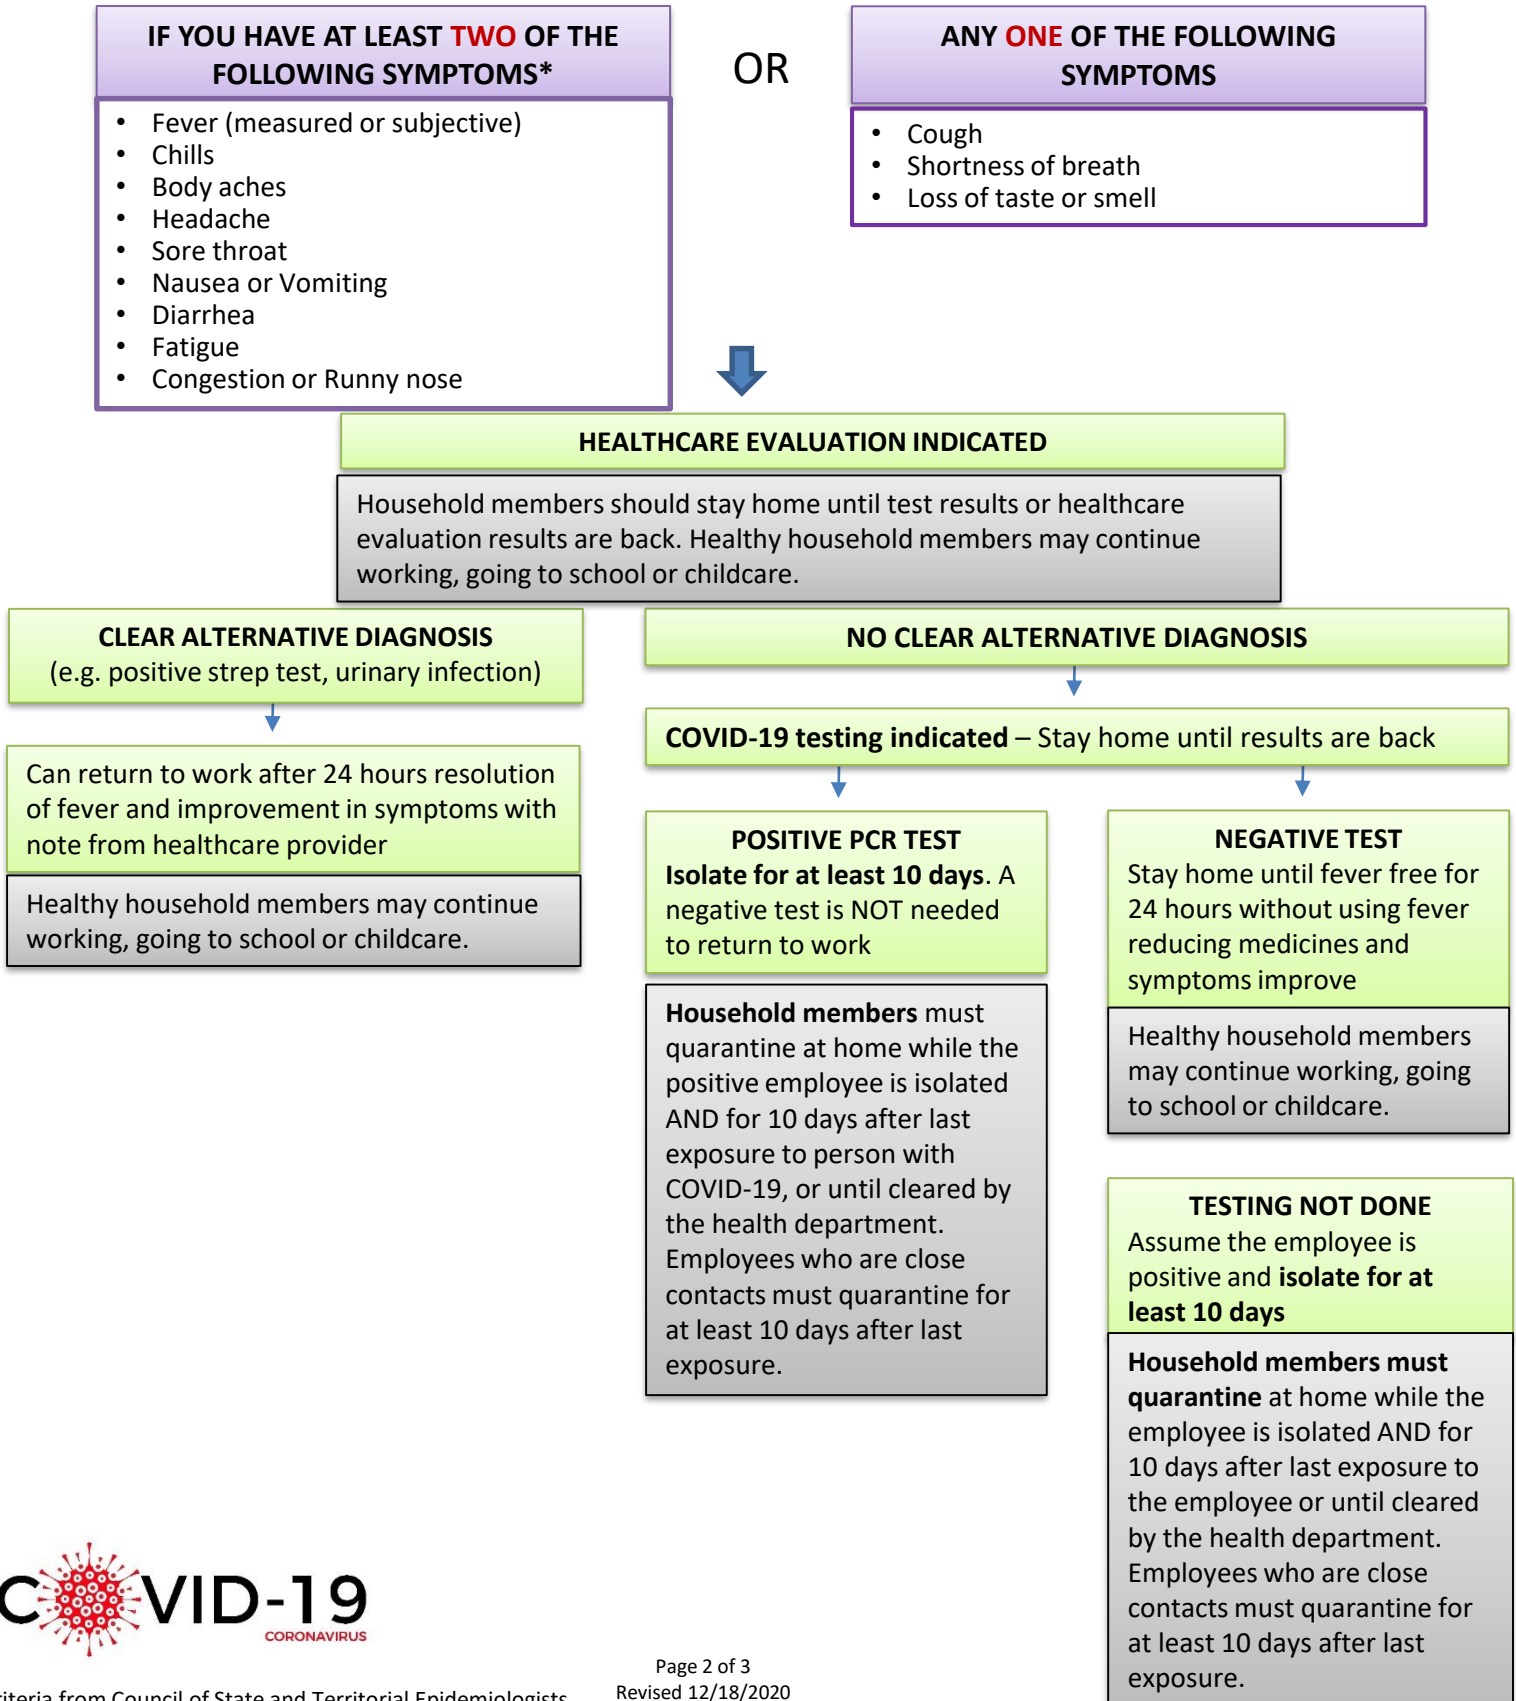

A negative COVID-19 test does not mean that someone who is a close contact can end quarantine early.

Employee has symptoms concerning for COVID-19

Employee screens positive for a **symptom** on screener AND has **no known exposure** to someone with COVID-19 in the past 14 days:

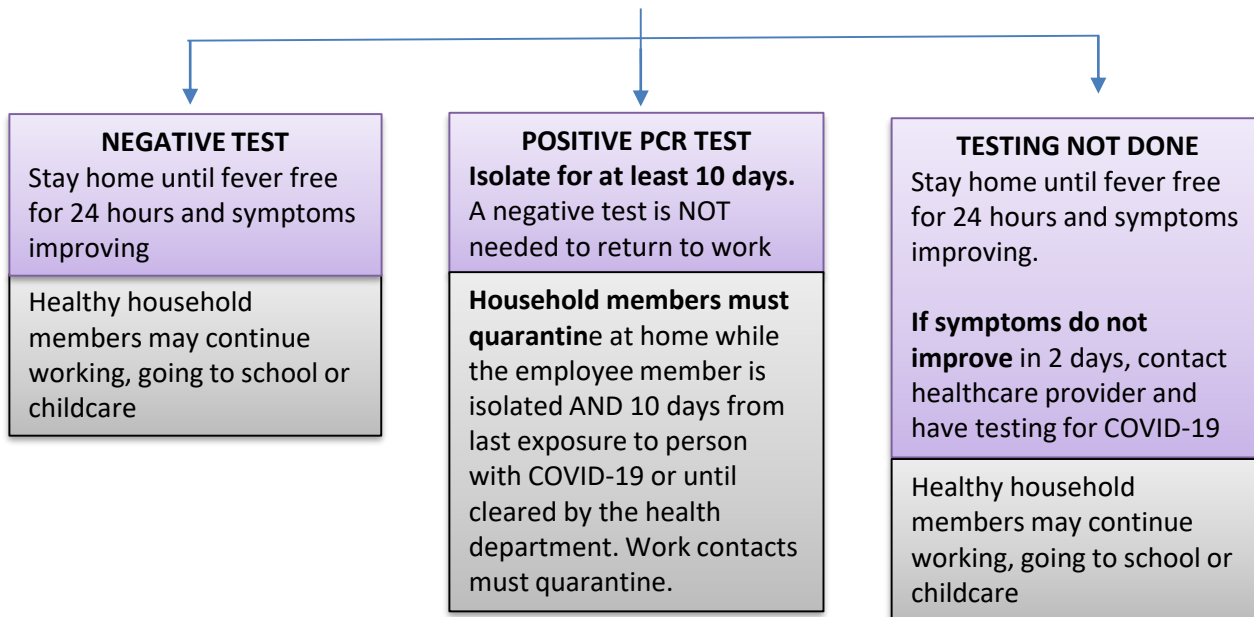

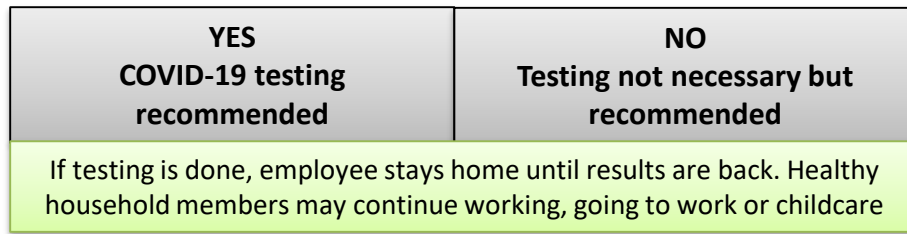

* Criteria from Council of State and Territorial Epidemiologists

Employee has symptoms but does not meet criteria on page 2

Your symptoms DO NOT meet the criteria below.

Have you been around anyone who has been sick in the past 14 days?

SYMPTOMS CONCERNING FOR COVID-19:

Any **TWO** of the following:

- Fever (measured or subjective)
- Chills
- Body aches
- Headache
- Sore throat
- Nausea or Vomiting
- Diarrhea
- Fatigue
- Congestion or Runny nose

If you **do not** meet these criteria, then follow the guidance above

OR

ONE of the following:

- Cough
- Shortness of breath
- Loss of taste or smell

If a person tests positive for COVID-19 with a PCR test and does NOT have symptoms:

- A repeat test is not needed for the next 3 months
- Quarantine is not needed if the person is exposed to someone
- If the person develops symptoms concerning for COVID, the decision to test for COVID-19 should be made with a physician on a case by case basis
